Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4, 10-12, 16 and 18-20 rejected under 35 U.S.C. 102(b) as being anticipated by Dachniwskyj et al. P.N. 5,570,021 (Dachniwskyj).

Dachniwskyj discloses a gradient coil system for a Magnetic Resonance Imaging apparatus. Applicant's attention is directed to Fig. 1 and the description of the same at col. 3 and 4. Gradient coil assembly 12 is attached to cylinder 16 by a layer of epoxy 28. Note also the provision of cooling tubes 46. Dachniwskyj meets all the limitations of the claims at issue.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 5-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dachniwskyj as applied to claims 1-4, 10-12, 16 and 18-20 above, and further in view of Takenouchi P.N. 5,332,972 and Otsuka P.N. 5,552,281.

The differences between the prior art as represented by Dachniwskyj and the claims at issue is the shape of the gradient coil carrier. To provide either a barrel shape or separate halves for the gradient coil carrier would have been obvious to the artisan of ordinary skill in the art in view of the teachings of Takenouchi and Otsuka. Takenouchi and Otsuka teach respectively the recited shapes as advantageous for the reduction of acoustic noise in MRI systems.

Allowable Subject Matter

7. Claims 13-15 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2859

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Edelstein et al. discloses a gradient coil structure for MRI systems. Note the abstract of the disclosure.
